

Pub/Sub: Qwik Start - Console

GSP096

- Pub/Sub enables asynchronous messaging where producers publish to topics and consumers subscribe for reliable event delivery.
- Subscriptions support pull requests or push webhooks, requiring message acknowledgments within configurable time limits.
- This lab teaches creating topics as centralized message holders for data streams.
- Set up subscriptions to connect topics with consumer applications for targeted access.
- Practice publishing messages to topics then consuming them via pull subscriber mechanics.

message ordering

☐

Order messages with an ordering key

When enabled, messages tagged with the same ordering key will be received in the order they are published. This option cannot be changed later. Enabling message ordering may increase publish-to-subscribe latency and decrease publish availability.

Dead lettering

☐

Enable dead lettering

Subscriptions may configure a maximum number of delivery attempts. When a message cannot be delivered, it is republished to the specified dead letter topic.

Retry policy

Retry policy will be triggered on NACKs or acknowledgement deadline exceeded events for a given message. [Learn more](#)

☒ Retry immediately

☐ Retry after exponential backoff delay

🔖 Simplify Event Driven Processing with Cloud Pub/Sub

Task 4. Publish a message to the topic

1. Navigate back to **pub/sub** > **Topics** and open **MyTopics** page.

2. In the Topics details page, click **Messages** tab and then click **Publish Message**.

3. Enter **Hello World** in the **Message** field and click **Publish**.

Publish message

Topic name

projects/qwiklabs-gcp-04-417eafdb59c9/topics/MyTopic

Publish count

You can publish the given message once or multiple times in an interval. This can be useful for getting messages in new subscriptions and testing. For a more robust way to publish messages multiple times, consider using Cloud Scheduler.

Number of messages *

1

Enter an amount between 1-100.

Message interval (seconds)

1

How long to wait before publishing the next message

Message body

The message you want to publish to this topic. Either message or attribute will be required to publish.

PUBLISHCANCEL

Task 5. View the message

To view the message, use the subscription (MySub) to pull the message (Hello World) from the topic (MyTopic).

• Enter the following command in Cloud Shell:

gcloud pubsub subscriptions pull --auto-ack MySub📄

The message appears in the DATA field of the command output.

```
student_01_8545be9b812e@cloudshell:~ (qwiklabs-gcp-01-8d32c5af2c4c)$ gcloud pubsub subscriptions pull --auto-ack MySub
DATA: Hello World
MESSAGE ID: 11938495658530057
ORDERING KEY:
ATTRIBUTES:
DELIVERY ATTEMPT:
ACK STATUS: SUCCESS
student_01_8545be9b812e@cloudshell:~ (qwiklabs-gcp-01-8d32c5af2c4c)$
```

You created a Pub/Sub topic, published to the topic, created a subscription, then used the subscription to pull data from the topic.
